\$ _____ towards equipment for animal welfare

\$ _____ towards animal enclosures

\$ _____ for help where it is most needed

\$ _____ towards platypus food

\$ _____ towards tree plantations for koalas & tree kangaroos

WHO WE ARE

The Friends of Fleay's Association is the volunteer organisation supporting the David Fleay Wildlife Park on Queensland's Gold Coast.

We are committed to:

- conservation of the environment
- preservation of Queensland's wildlife
- assisting in research on threatened species
- education of the community

David Fleay Wildlife Park features Australian animals housed in natural habitat-inspired enclosures. It is home to many native animals, birds, plants and ground-breaking research. David Fleay visitors to the park enjoy birds, including eagles, brolgas, jabiru, owls and cassowaries, as well as crocodiles, kangaroos, koalas, tree kangaroos, snakes, lizards, gliders, and even butterflies. And we are the only park on the Gold Coast where you can see a platypus!
